

Store Footprint Efficiency SQL Report

Section 1

Business Question

How many physical stores exist, and do all have valid Square Meters values?

Query Result

Total Stores	Invalid Square Meters Value
66	0

Findings

- The dataset contains 66 physical stores after excluding the online store (StoreKey 0).
- All physical stores have valid Square Meters values (no NULL or zero values).
- The dataset is complete and suitable for productivity analysis.

Section 2

Business Question

What is the total revenue generated by each physical store, including stores with zero sales?

Query Result

StoreKey	Country	Square_Meters	Open_Date	Total Revenue
55	United States	2000	2009-12-15 00:00:00	1417885.41
50	United States	2000	2008-03-06 00:00:00	1394738.06

58	United States	1330	2007-07-08 00:00:00	0

Findings

- Revenue was calculated for every physical store, including stores with no recorded sales.
- 9 out of 66 stores generated zero revenue despite occupying retail space.
- These zero-revenue stores represent the biggest operational concern.

Section 3

Business Question

What is each store's revenue per square meter, and how do stores rank from best to worst?

Query Result

StoreKey	Country	Square_Meters	Total Revenue	RevenuePerSqm	ProductivityRank
66	United States	840	1220964.38	1453.53	1
43	United States	1190	1250255.14	1050.63	2

46	United States	1015	0	0	58
25	Germany	1610	0	0	58
60	United States	1260	0	0	58

Findings

- Revenue per square meter provides a better productivity metric than total revenue.
- High-ranking stores utilize floor space efficiently.
- The 9 zero-revenue stores rank last with 0 revenue per square meter.

Section 4

Business Question

Is underperformance concentrated in specific countries, or is it spread across all of them?

Query Result

Country	NumStores	CountryRevenue	CountrySqm	AvgRevenuePerSqm
United States	24	23764425.86	37990	625.54
France	7	1229545.95	2390	514.45
Canada	5	3611561.79	7130	506.53
Italy	3	2059086.81	4300	478.86
United Kingdom	7	5749769.78	12600	456.33
Germany	9	4246279.22	12750	333.04
Netherlands	5	1591344.48	6125	259.81
Australia	6	2099141.07	9260	226.69

Findings

- The United States has the highest average revenue per square meter.
- It also contains 4 of the 9 zero-revenue stores, which country averages can hide.
- Small countries can appear worse because a single underperforming store has a larger impact.
- Country-level metrics should be interpreted alongside store-level analysis.

Section 5

Business Question

Do small, medium, and large stores differ in average revenue per square meter?

Query Result

Size Bucket	Total Stores	AvgRevenuePerSqm
Small	13	575.32
Medium	48	484.9
Large	5	410.15

Findings

- Small stores average about \$575/sqm and are the most productive.
- Medium stores average about \$485/sqm.
- Large stores average about \$410/sqm and perform the worst.
- Increasing store size does not necessarily improve productivity.

Section 6

Business Question

Are underperforming stores mostly newer stores (still ramping up) or older stores (genuine problem)?

Query Result

OpenYear	NumStores	AvgRevenuePerSqm
2005	3	430.57
2007	5	223.08
2008	8	445.49
2009	6	317.18
2010	11	493.75
2012	14	475.24
2013	3	496.88
2014	3	894.42
2015	9	676.89
2018	3	593.68
2019	1	799.36

Findings

- Store age alone does not explain performance.
- Stores opened in 2007 and 2009 have the lowest productivity.
- Several older store cohorts still perform well.
- Operational factors are more important than age.

Section 7

Business Question

Which stores deviate significantly from their country average revenue per square meter (best and worst outliers)?

Query Result

StoreKey	Country	Square_Meters	RevenuePerSqm	CountryAvgRevPerSqm	DeviationFromCountryAvg

18	France	310	729.29	522.31	206.97
40	United Kingdom	1300	701.23	482	219.23
51	United States	1295	873.04	648.4	224.64
64	United States	1330	946.88	648.4	298.48
53	United States	1260	947.56	648.4	299.15
56	United States	1260	958.14	648.4	309.73
21	Germany	560	718.35	406.49	311.85
47	United States	1120	1009.59	648.4	361.19
26	Germany	350	799.36	406.49	392.86
10	Canada	1210	862.14	467.66	394.48
43	United States	1190	1050.63	648.4	402.23
29	Italy	1000	913.86	508.68	405.18
9	Canada	1500	890.77	467.66	423.11
66	United States	840	1453.53	648.4	805.13

Findings

- Store 66 (US) is the strongest positive outlier (+\$805/sqm vs country average).
- Stores 52, 46, 58 and 60 are the largest negative outliers.
- Lower deviations in other countries are mainly due to lower country averages.
- Deviation analysis highlights stores requiring management attention.
